

Product Release

For Immediate Release

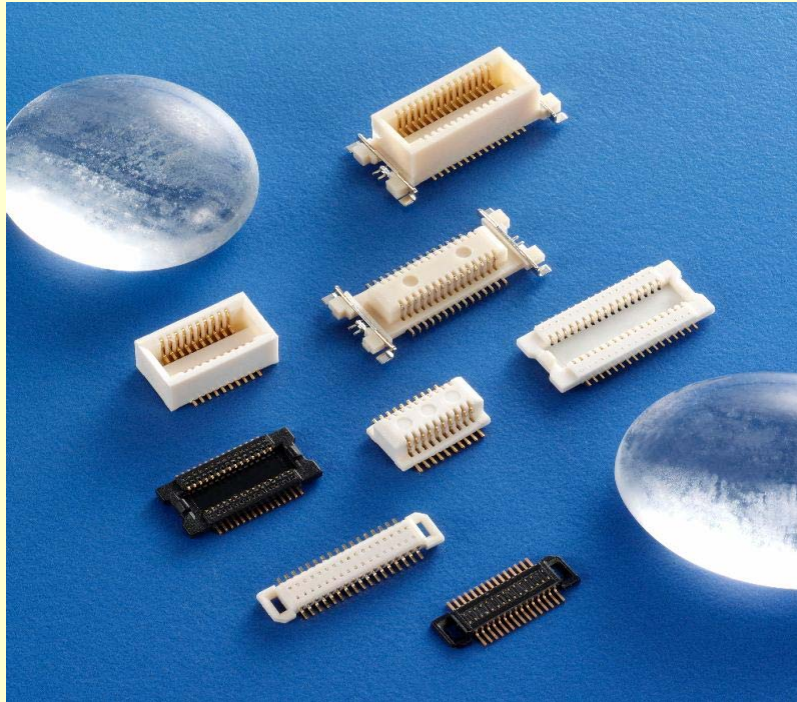

Oupin America Inc. Announces

Our new 2300 Series connectors are available in .5 mm and 1.0 mm, with pin counts available from 10 to 100. Current rating .5A and a operating temperature of -25°C~+85°C. We are offering up to 10 different stacking heights to accommodate almost all your designs. All products are available in Tape and Reel and Tube packaging. Major applications include Cell Phone Technology, POS Terminals, Credit Card Terminals, Imbedded Computers and PCI Express.

The PCI Express is an I/O interconnect bus standard (which includes a protocol and a layered architecture) that expands on and doubles the data transfer rates of original PCI. Any design where high pin counts are required in a restricted space

Please refer to series 2318, 2343, 2348 and 2349 on our website, or use the convenient links below to view and print the data sheets.
